EVOLUTION V5

You talk,

Yachts and Cruiseliners are masterpieces of design and modern technology. Hundred or thousands of functions providing the highest level of comfort and safety. Rockson Automation system make them controllable and visible.

EVOLUTION V5 is our integrated control and monitoring system which Rockson has developed.

we listen..

All applications you need - we show you all at a glance. Same or different views - at engine control room or on the bridge.

..and design.

EVOLUTION VS

Even the elegant look and feel as well as the intuitive menu navigation are high quality.

You ask,

You also save a lot of time and money as the customer because we offer everything from one source.

we think..

Also our visualization is open for your personal wishes. Rockson has the resources to develop as your own.

EVOLUTION VS is customized for each individual project. From a simple alarm system up to highly sophisticated integrated control and monitoring systems.

..and make it possible.

EVOLUTION V5

You need attention to the details,

EVOLUTION V5 reports
all system-relevant aspects
and can deliver them
remotely to the chief

if necessary, we can save
the file where it is needed

in every way feel free to use our
excellent consulting services because our
engineers are available on each
level of the design process

we have more than 20 year's experience..

our visualization is very elegant,
with everything shown on different
sizes of panel PCs, very smart
integrated in your interior

of course it's possible to
view the system via remote
access on different gateways

if you are in port
the chief can view
the system on his
mobile phone or tablet

..and build with reliability.

EVOLUTION V5

all components are specialized for
the maritime market

with our expert knowledge
we can back up your specialists

our proprietary system is
optimized for yacht and cruise liner
applications

Your aim, our mission...

...powered by people.

we are able to integrate owner
specific needs and visions

we are a professional team

we are confident and independent

we use our colleagues' years of
experience and expert knowledge

and we are proud of our crew
and their motivation
